SDG 2: Zero Hunger

Sustainable Development Goal 2:
To end world hunger, make sure
evryone has safe food, and to
provide food to everyone.

- SDG 2 aims to end hunger and achieve food security by 2030.
- It's focused on ensuring access to safe, nutritious food for all and creating sustainable food systems.
- The world is currently off-track, with 783 million people facing hunger due to conflict, climate, and economic shocks.
- Since so many people suffer from not having enough food, this is an important issue.

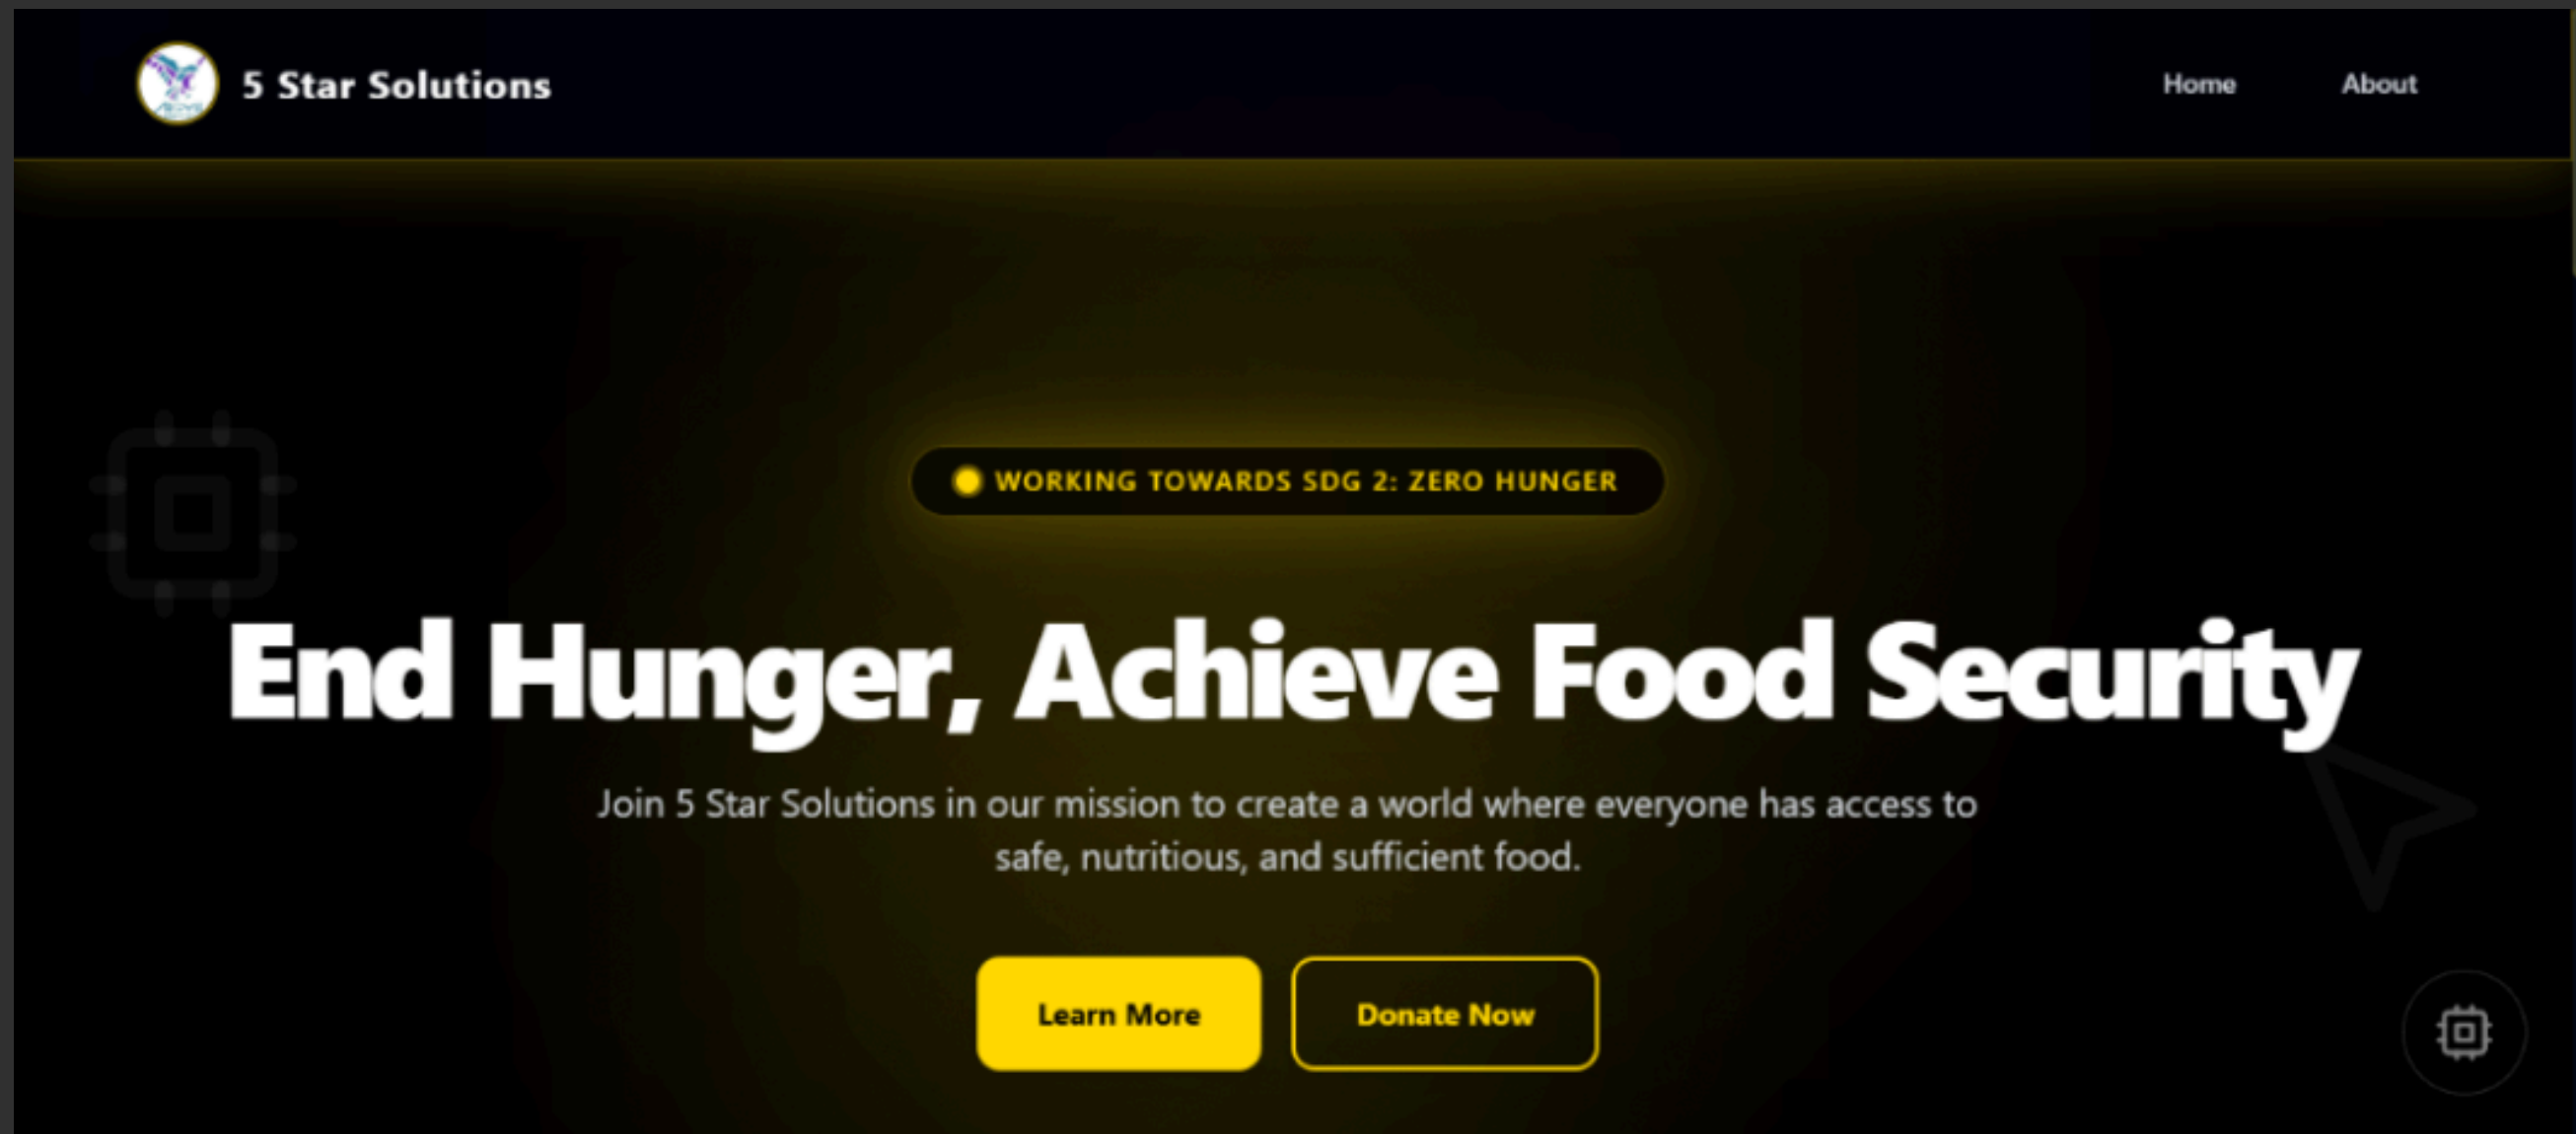

Problem Statement

- For our Capstone project, we are focusing on SDG 2: Zero Hunger.
 - Many families, children, and individuals struggle with food insecurity.
 - Our project involves developing a website that connects users with local food banks, soup kitchens, and pantries.
 - This website will also be translated for those who are not fluent in English. This issue affects communities across the United States daily, and our website will streamline access to resources.
- 
- 

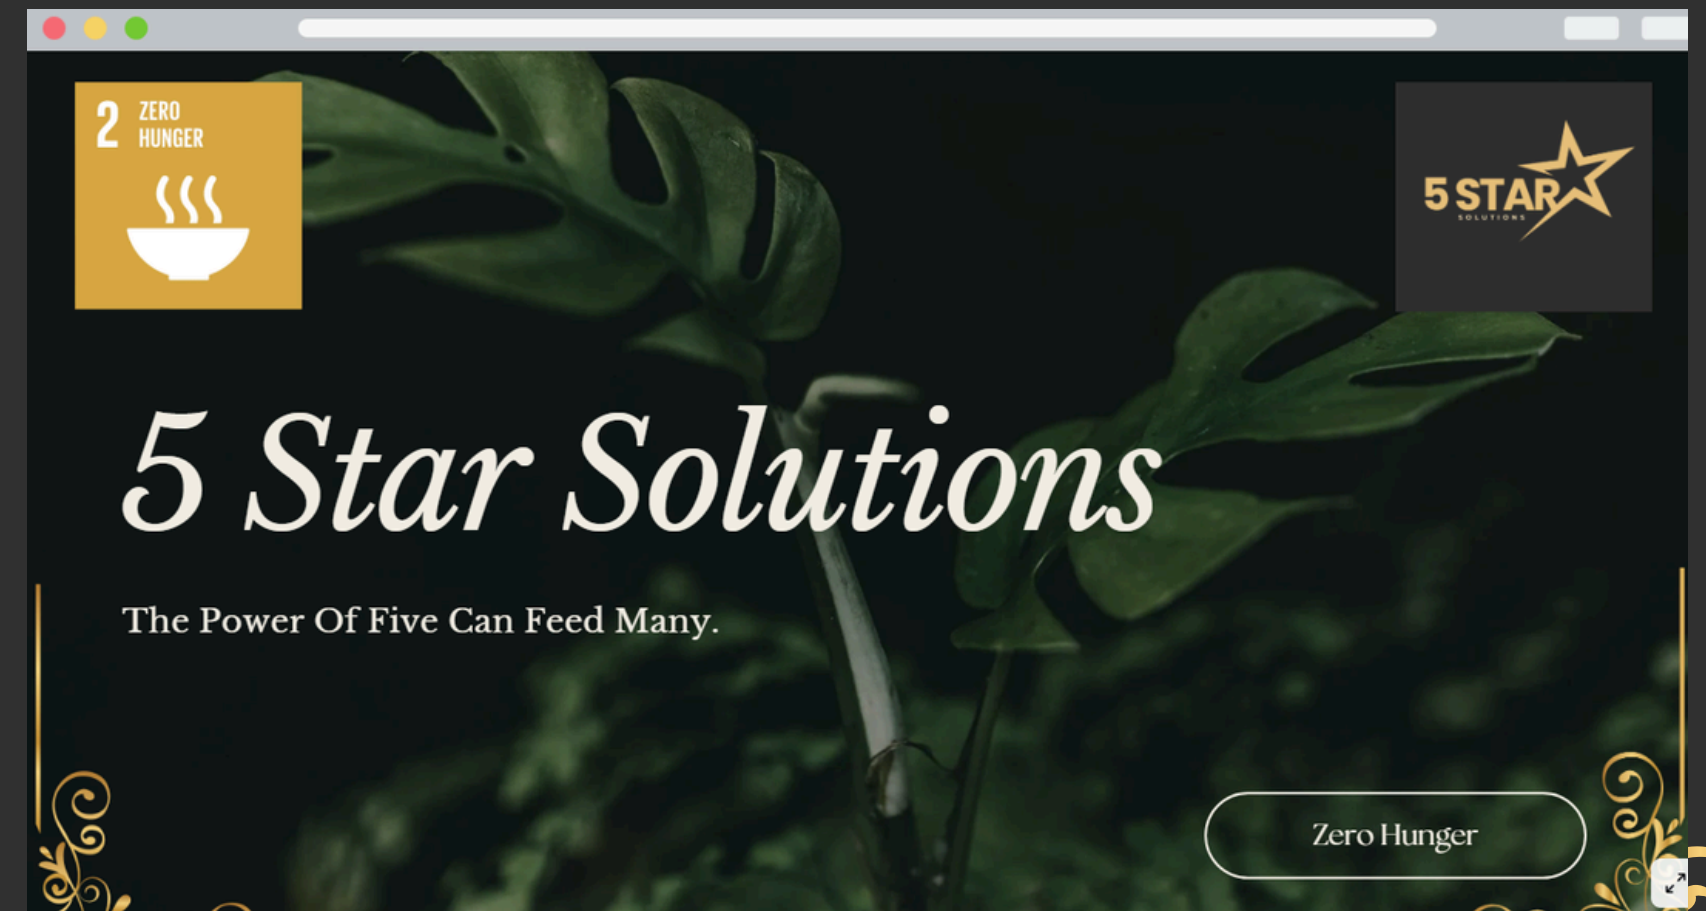

Design Statement

- Our team is making a user-friendly website designed to help food insecurity and assistance by mapping local, free food services, soup kitchens, and meal providers.
- We are making this by using a software to make our website then we're going to use canva to build a directory of local food banks, soup kitchens, and pantries.
- This will help solve our SDG (zero hunger) by letting people be able to know local food banks that will support them.

Our Prototypes

Our Prototypes

Conclusion

- Our website will end hunger in our area, by providing an accessible way for all people to find safe healthy food.
- This model will help us create a permanent method of ending hunger by partnering with community food bank.
- We are hoping that once this model shows improvement in this area, we can have the opportunity to expand this in more areas in US.
- We will have it translated into a couple of languages, so people who are not fluent in English will also have access to this food bank.
- This website creates a way to end hunger in a private, efficient, and user-friendly way. We invite you to partner with us in this enterprise, whether through funding, technical support, or by volunteering. Thank you for your time!

THANK
YOU!
